

Hymmen EMC Pressentechnik GmbH

the professional service company in the field of press technology,
independent of original equipment manufacturer, for all types of presses!

Competency and Know-how for the

wood, rubber and
plastic processing industries

Benefit from experience – gained on the basis of the Becker & van Hüllen press manufacture

May we introduce ourselves as: **Hymmen EMC Pressentechnik GmbH**

We are a subsidiary company of the **Hymmen Group**.

Our Know-how in engineering, production and installation looks back on many years of experience in several longstanding mechanical engineering companies rich in tradition.

The **Hymmen EMC Pressentechnik GmbH** offers you innovative, economical as well as future-oriented concepts for press plants, which reflect state-of-the art technology.

Innovative thinking, flexibility, technical expertise and the constant willingness to try also unexplored paths if necessary, all ensure that well-known companies in the wood, rubber and plastic processing industry belong to our range of customers.

The success of our customers is also our success.

**We offer you a
partnership – so that you can concentrate
on essential things.**

The **Hymmen EMC Pressentechnik GmbH** is a recognised expert and manufacturer in the field of press technology and all related services. Our technical competency has been developed on the basis of the Becker & van Hüllen press manufacture.

Our services:

- Press extensions, overhauls and modernisations
- Individual concepts for new construction of short-cycle presses as well as single systems
- Delivery of press components and spare parts
- Repair and maintenance works
- Inspections
- Dismantling and re-assembly of presses and displacements of plants

**A partnership
– to be profitable for you!**

Press extensions, overhauls and modernisations

**Our competency increases the efficiency
and functioning of your press!**

Your press is good for more.
This is made possible by:

- Overhaul and extension
- Increase of capacity by increasing the number of daylight in the multi-platen press
- Installation of up-to-date handling components
- Installation of the most progressive hydraulic systems in order to reduce the press cycle times
- Installation of the most advanced electronic control systems

Depending on the technical conditions and operating circumstances an increase in production is possible.

... independent of original equipment
manufacturer,
for all types of presses!

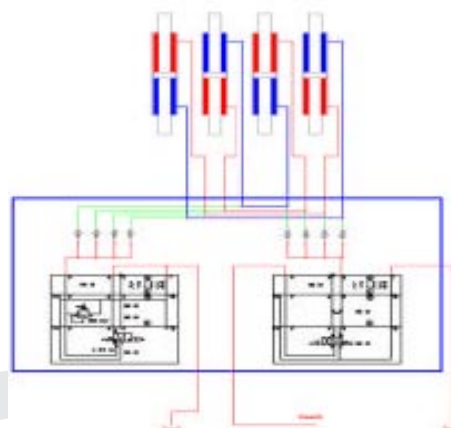

Individual new construction of short-cycle presses as well as single systems

**We offer you a partnership,
on which you can count!**

- Individual new construction of short-cycle presses
- Individual new construction of single systems (components), such as:
 - Synchronizing device
 - Hydraulics
 - Control technique

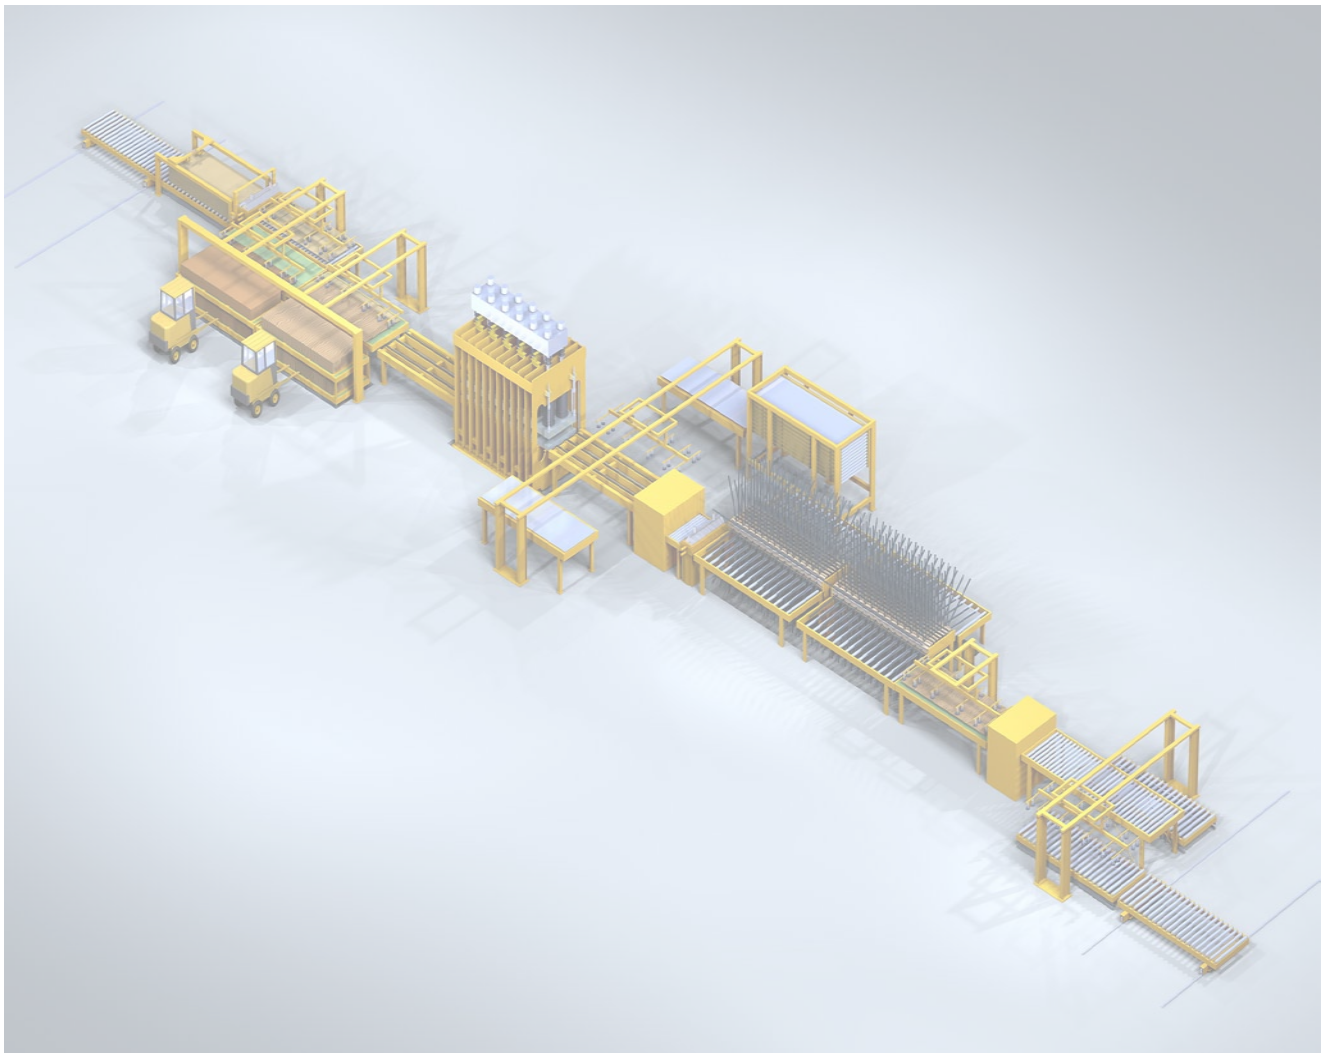

... independent of original equipment manufacturer, for all types of presses!

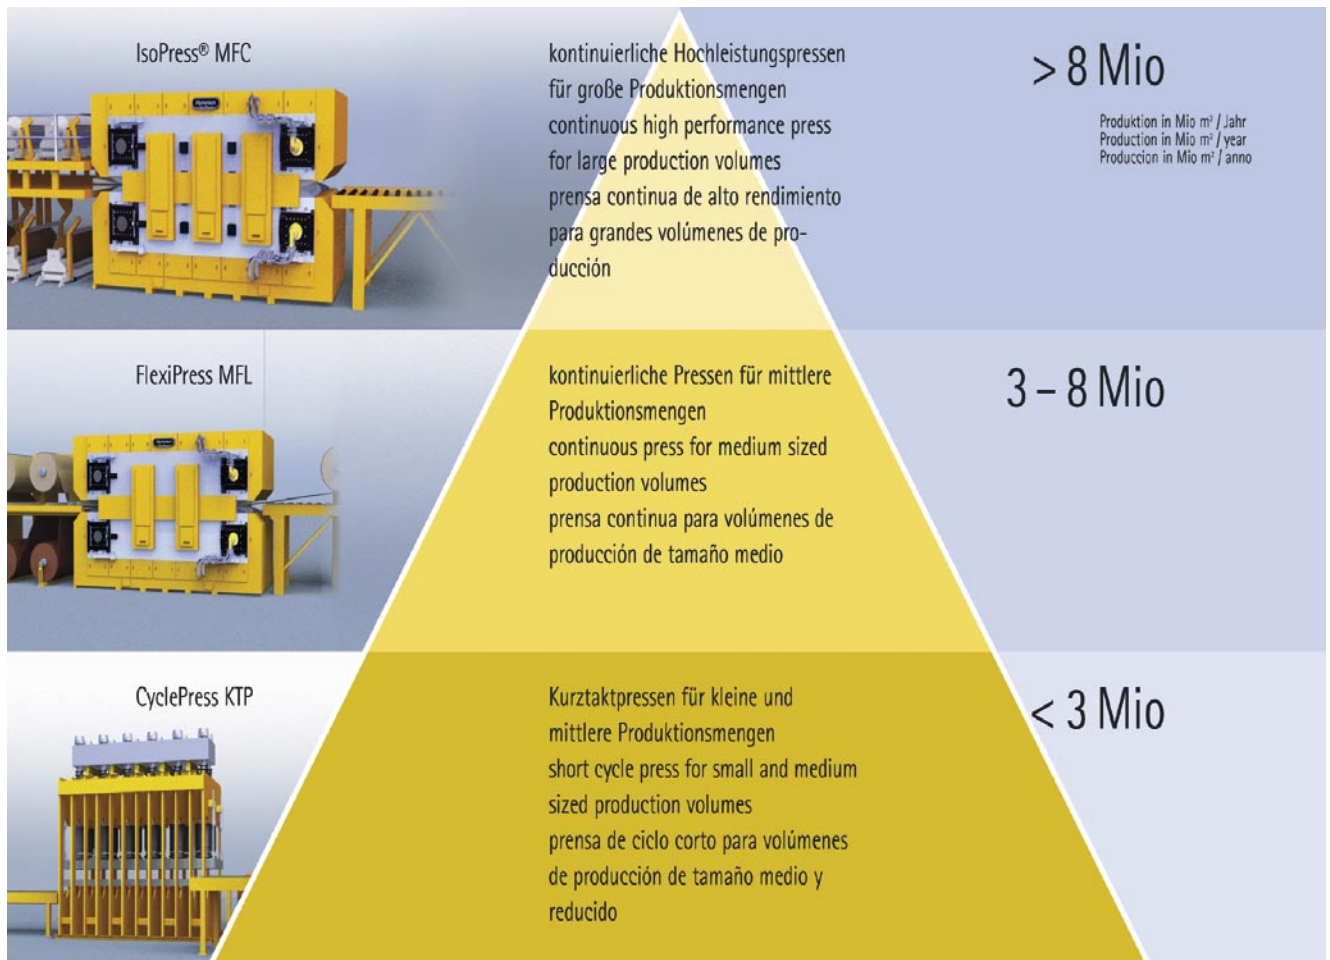

Hymmen Cycle Press KTP

**the short cycle press for small production volumes,
small batch sizes and a very high flexibility.**

Competency along the complete line

Sales Service and Assembly from one source

Repair and Maintenance works

**Know-how and competency –
for all types of presses, independent of
original equipment manufacturer**

The company **Hymmen EMC Pressentechnik GmbH** offers you:

- prompt supply of spare parts
- Professional repair weldings
- New construction of components
- Service at site in 3 shifts
by own qualified personnel
- Short-term mechanical processing
also of large components
- Execution in due time

**... independent of original equipment
manufacturer, for all types of presses!**

Delivery of press components and spare parts

We offer you a partnership –
which is worth it.

Press Components

- Heating platens
- Frames
- Table / Crossbeam
- Cylinder units
- Heating equipment

Spare Parts

Various parts subject to wear, such as:

- Valves
- Bearing parts and filter elements
- Sealings etc.

as well as special parts according to drawing

... independent of original equipment
manufacturer, for all types of presses!

Inspection and Maintenance works

**We give you security –
maintain the functioning of your press plant.**

Have confidence in our experience for the early recognition of damages or weak points.

With the help of a standardized testing/checking protocol, your press plant will be thoroughly checked in every detail by our experts.

After finishing of our works, you get a detailed test certificate with all results (check list) and – if necessary – proposals for maintenance and repair.

... independent of original equipment
manufacturer, for all types of presses!

Dismantling and Re-assembly of presses and displacements of plants

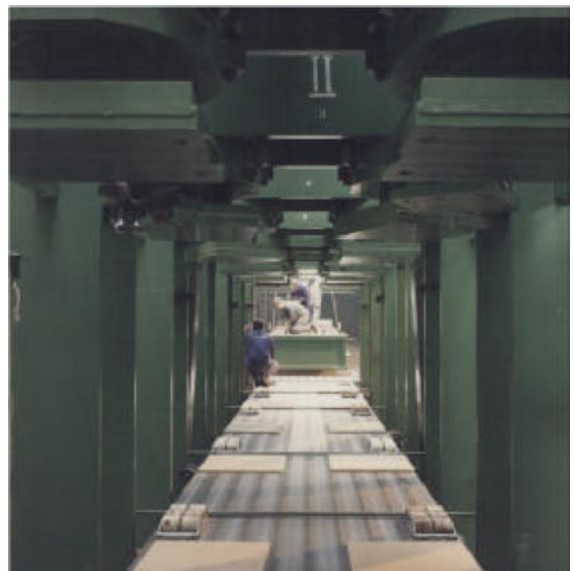

We offer you a partnership
by evaluating existing status – also in complex situations.

The Hymmen EMC Pressentechnik GmbH

– your competent partner – for dismantling and re-assembly of your press plants.

Beginning with the internal displacement of your press plant within the company's site up to the displacement from one location to another location – worldwide.

If desired, we take over the complete execution, beginning with the planning and realization of the project up to the putting into operation of your press plant.

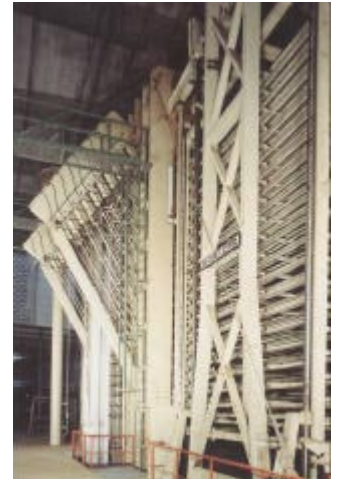

... independent of original equipment
manufacturer, for all types of presses!

Our competency improves your efficiency and competitiveness

The customers of Hymmen EMC Pressentechnik GmbH benefit from our experience in press technology for many years, especially in the following fields:

- Manufacture of veneer-, plywood- and particle boards
- Manufacture of coated carrier plates
- Manufacture of technical and decorative laminates
- Manufacture of smooth and profiled rubber plates and technical rubber components
- Manufacture of fabric and reinforced steel-rope conveyor belts

Thereby increasing efficiency and as a result,
your competitiveness.

Extract from our list of customers:

Pfleiderer AG
Thermopal
Eternit AG
Hornitex Werke
Finnforest, Finland
Japan Novopan, Japan
Shamoushak Co., Islamic Republic of Iran
Witex Robin Floor, Malaysia

Please contact us and convince yourselves
of our efficiency.
